PROFESSIONAL SUMMARY

Software Engineer specializing in high-performance backend infrastructure and event-driven architectures. Proven ability to architect scalable platforms and optimize data workflows, coupled with a foundational background in AI/ML and practical experience utilizing Generative AI tools to accelerate development.

EDUCATION

Parul University <i>B.Tech in Computer Science & Engineering (CGPA: 7.83)</i> Specialization in AI/ML <i>Minor Focus on Deep Learning Architectures (CGPA: 8.35)</i>	Vadodara, Gujarat 2023 – 2027 Diploma in Neural Networks & Deep Learning 2024 – 2025
---	---

PROFESSIONAL EXPERIENCE

Freelance Software Engineer <i>Custom POS Solution (Client: Local Cafe)</i> – Engineered a serverless POS system replacing SaaS, cutting client software costs by 70% . – Architected a Firebase backend for real-time inventory and zero-maintenance billing. – Developed a native-performance Flutter app with offline data and daily financial reporting.	Remote 2026
--	----------------

PROJECTS

Axion — EV Fleet Telemetry & OTA Platform <i>Python, Spring Boot, Kafka</i> [GitHub] – Designed a Kafka-driven EV telemetry platform processing 1,000+ sensor events/min. – Architected a Redis-backed digital twin engine, reducing state inconsistencies by >90% . – Engineered a rule-based health scoring system and an OTA pipeline with canary rollouts .	2026
Parallax — Collaborative Code Editor <i>React, Spring Boot, WebRTC</i> [GitHub] – Engineered a collaborative editor supporting 50+ concurrent users via Spring Boot & WebSockets. – Integrated WebRTC for low-latency, peer-to-peer voice and video developer collaboration. – Implemented session state reconciliation to preserve data consistency during parallel edits.	2025
JSON Parser Library <i>Java, JUnit</i> [GitHub] – Developed a dependency-free JSON parsing engine capable of parsing 10MB+ nested files. – Designed a path-based query engine for constant-time key lookups via hash structures. – Integrated comprehensive JUnit test coverage and detailed syntax error reporting.	2025

TECHNICAL SKILLS

Languages: Java, Python, C, JavaScript, TypeScript, Dart, SQL Backend/Dist. Systems: Spring Boot, Hibernate, JPA, REST APIs, JWT, Apache Kafka, Redis AI/ML & Gen-AI: Machine Learning Basics, Deep Learning Concepts, Prompt Engineering, Gen-AI Tools Cloud/Databases: Docker, AWS, Firebase, MongoDB, PostgreSQL, MySQL, Git Core Competencies: Cross-Functional Collaboration, Analytical Problem Solving, Agile Adaptability
--

CERTIFICATIONS

- ServiceNow Certified System Administrator (CSA).
- AWS Academy Graduate — AWS Academy Cloud Foundations.
- HackerRank Certified: Java and Python.
- IBM SkillsBuild — AI Fundamentals (Cisco Networking Academy)

ACHIEVEMENTS

- Solved **600+ DSA problems** across major platforms.
- Selected for **GSSoC** (GirlScript Summer of Code) in Open Source & AI Agent track.
- Selected for **State-Level Regional** at OpenAI Academy × NxtWave × IndiaAI Hackathon.
- Selected as one of **100 students** university-wide for the ServiceNow CSA & CAD training program.
